

OPEN HOUSE

O.K. Centrum für Gegenwartskunst

[03 - 05/04]

OPEN HOUSE focuses on the status of art and the public sphere today.

The invited artists pose the concept of the urban public sphere, the production of visual images in urban space and the possibility of artistic interventions in public space for discussion, thus dealing with relevant themes that go far beyond the field of art.

The exhibited works are located at the intersection of art, social practice and political activism, leading from O.K into the city as the field of action.
